

Energy Saving Tips at School

Write down your energy saving tips under the following headings

Lighting	Votes
Take advantage of the sunlight during sunny days instead of having the lights on.	147
Turn off the lights when you leave the classroom.	103
We can install motion sensors at schools so lights turn on with the opening of a door or some sort of motion.	69
Use natural light when possible.	9
Switch over to CFLs (Compact fluorescent lights) or LEDs, as they are more efficient.	6
Turn off the lights when there is sunlight.	0

Heating and Cooling	Votes
Close the door and the windows when you leave or enter the classroom in order to keep the classroom heated.	1002
If fans are available in your school, use these instead of turning on the air conditioning.	169
Invest in better cooling options, perhaps fans instead of air conditioning. They are more economical.	9
Remove any furniture, clothes, objects that block the radiators and absorb the heat.	0
Turn off or slow down (ideally 19o degrees) the heating system when the temperature of the class is already high. You can do that by installing thermostats.	0
Open the windows when the students leave the classroom. That way, the classroom gets cooled and the air is refreshed.	0

Appliances	Votes
Replace old computers with new ones, as old ones consume more energy	200
Unplug any device, as soon as you have finished using it.	9
Switch to new flat LCD screens, as they require less energy to operate, compared to old TVs.	6
Use electric timers to automatically turn on and turn off devices.	0

Switch off the devices that you do not use	0
--------------------------------------------	---

Getting others involved	Votes
We can raise students' awareness by posting slogans, facts, articles about conserving energy to social media.	21
Starting a campaign about environmental concerns to persuade students to participate in environmental projects.	0
Spread awareness by giving leaflets to other students	0
Experts can come to schools and give talks about the importance of saving energy	0
Spread the word by doing school projects on why saving energy is important.	0
Hang posters, signs, stickers around the school classes to remind everyone the energy saving activities.	0
