

DSAG AK B1 im Konzern

Brainstorming about B1 Localizations

Questions & Challenges about Localization Russia	Votes
Handling of cash discounts	0
Printing templates could be improved (address logic not consistent, no Header Discount is considered, ...)	0

Challenges with B1 Localizations in General	Votes
Gerrit Berberich: Get insides of process how SAP perform Maintenance of Localizations. How many local product experts? How many Developers and Budget? How does the SAP get info about new legal requirements and how do they react? Are there meetings of all local product experts who try to harmonize solutions?	1
priority of the request of local product expert ?	0

Suggestions for Improvement	Votes
When creating support tickets -> faster access to localization experts (2nd/3rd level) --> Add Russia to selection in ticket creation like e.g. Brazil is already available	1
Tools are not totally tested (e.g. fields / Templates are not available in DTW (DI API/Service Layer) Partners are involved in Testing	1
Gerrit Berberich: SAP should find a solution to allow changes related to legal requirements without waiting and performing upgrades/patches (high effort on customer side esp. when having subsidiaries in several countries)	0
Strengthen partner companies to learn, use & test localization functions -> Offer for example incentives for involvement	0
Enforce local product experts to deliver functions as complete package -> Help pages / documentation (also in english!) -> Expose fields and functions to Migration and Integration Tools	0

Report clearly what is ready by SAP and maintained and what not (e.g. Printouts SQL/HANA...). Difficult to collect all information through different SAP Notes	0
