Middleton CORP

Looking into the future, what are your big ideas and aspirations for Middleton's parks and trails?	Votes
Dog owners need a quality dedicated park. Facilities now available are non-human friendly and don't segregate large and small dogs well.	1
A network of bike paths in all directions to connect with surrounding town and county paths.	1
Keep conservancy lands as limited use areas. Maximize their restoration. Educate public that these are not parks.	1
A dog park that offers seating areas, dog play, water, shade and so on would help take pressure off the Conservancy lands.	1
No more pesticides or herbicides on lawns. Embrace the dandelions and clover to make bee-friendly mowed areas. Check out the bee lawn project from the U of Minnesota. https://www.beelab.umn.edu/learn-more/beelawn I also hope that native plant areas will be expanded to create as much prairie and savannah as possible. And I hope rain gardens are used extensively to manage storm water from the parking lots in our parks.	0

What do you love most about Middleton's parks and trails?	Votes
Walking paths, bike routes, conservancy lands, the outdoor pool and its offerings.	1
