Cod(h)erSpace - Contract testing workshop

<b>What went well</b>	<b>Votes</b>
Excellent structured agenda, equally well executed session, explained core concepts, tools and specifications with demo to fullest.	2
The content was detailed and well written. The trainers carried the session very well. The demo was well presented as well.	1
The content on microservices test strategy was very well delivered and as a new QA joining thoughtworks, it helped me understand the concept	1
great detailed information, from what, why, and how for Contract Testing with the demo and repository for participants to try on. Thank you.	1
The trainers spent a good amount of time in conveying the content very clearly so that we understand all the concepts clearly	0
Thank you so much for the detailed flow with real time examples, this session is really helpful.	0

<b>What can be improved</b>	<b>Votes</b>
Some more time on the hands-on. 3 hours was less time to try it out practically	0
This could be nice if there is the script something similar to npm install and get to install all dependencies in the workshop repository.	0

<b>Any other feedback</b>	<b>Votes</b>
Contribution on weekend effort ! You are really into this. Thank you so much :D	0
