

Data Engineering Pilipinas: Community Insights for a Better 2025

Data Engineering Pilipinas: Community Insights for a Better 2025

Start Doing	Votes
Projects for a chosen beneficiary	18
Encourage DEP DC scholars to work on short projects based on learnings and present them under the DEP Data Masters platform. This can be incentivized e.g. those who volunteer to present their projects will have a longer DC scholarship duration than regular scholars.	8
Creating more accessible contents or courses to learn for the aspiring/career shifters that want to enter tech industry	7
More collaboration with the group members to do group projects that we can add in our portfolio	5
Project Competition!!!	5
Add a discord channel for members to share their project portfolio. (Although there is already an existing channel for sharing github profiles, others might be using a different platform).	4
Group projects with fellow members so that we can add it in our portfolio	3
Follow-along projects that are all stored in Github. Sample is https://github.com/DataTalksClub/data-engineering-zoomcamp	3
Weekly office hours where anyone can meet up on Discord and discuss anything DEP related. Similar to FWDP, we can also invite a speaker here and have a panel-style talk.	2
Data Engineers to post short video versions of end to end projects	1
More AI enabled resources for Data Engineering	1
More LowCode open source ideas for Data Engineering	1
Project with real world application, ala DE/DS for good, so that the community can apply the theoretical to actual	1
DEP Project/s Of The Year!	0

Keep Doing	Votes
Providing blogs/webinars/free resources to the aspiring professionals that wants to dig deeper in tech industry and wants to land a job	12
Keep the positivity in the community	12
More mentors willing to help beginners and career shifters	10

Mentorship Again	2
Knowled	0

Certifications. There are a lot of aspiring DA/DE/DS who farms a lot of certs, but can do actual outputs. :(	5
We are in the beginning of being overwhelmed by Microsoft products.	2
“Thank you for the data camp access”	2

Do More Of	Votes
Providing free and accessible Data Engineering education	9
Daily/weekly/monthly challenges that anyone can practice on and use as basis for their portfolio (e.g. the recent pokemon scraper project)	7
Provide follow-along projects and outputs which can be included in the Github portfolio of the interested participants	6
I suggest people to be more active in Discord. Like a simple Hi and some Hellos with the sample report of what we are doing like an online kamustahan weekly are enough to lighten my day.	5
Technical trainings that aligns with the real world scenarios	1
